

Star Group Sustainability Ava Berman

A lot of people think that its a lot of work to help their school be sustainable, but Jemicy School Star Groupers have been helping out Jemicy to be earth-friendly. To begin with, Jemicy school does a lot of TerraCycleing. We take chip bags and send them to the TerraCycle. When we give them are used chip bags and Kole - aid drinks also work we give it to them and they turn it into different things and so we don't waste. When we send it they turn into benches, backpacks, and different types of furniture to help the environment. Next, we make an effort to reduce the amount of paper we use. We help by trying not to waste post-it notes so we keep count of how many we use. We use double-sided paper to save the trees. We do something called print and release station were if we print something by accident and we can stop it from printing so it won't waste paper. Lastly, we use washcloths to clean tables. We don't use Clorox wipes instead we use washcloths to save the Earth. We take everyone's washcloths and we give them to one of our teachers to wash them for us. Every Friday Star Group goes around and collects washcloths from the different homerooms. Jemicy is doing a great job to help the Earth be healthy but not just healthy also friendly to the Earth.
