

Star group Sustainability
Nathan Carr

Star group wants to make the Jemicy School a more sustainable place. To begin with, Jemicy School TerraCycles juice pouches, and chip bags. We educate our schoolfellows to put the TerraCycle in the right spot. We gather the TerraCycle and send it to the TerraCycle company. TerraCycle uses TerraCycle to make other products like backpacks and more plastic. likewise, Jemicy School recycles paper, trash, cardboard, glass and more. On Thursdays and Fridays, we recycle the collection bins in each classroom. We recycle the bins in the lunchroom and dump it in the big bin. The recycling company comes and picks up the recycling and takes it to the recycling facility. Finally, We use washcloths to clean the tables. In the past, we used Clorox wipes to chaste the tables. Now we use washcloths to spotless the tables. Now since we use washcloths, we saved over 16,000 Clorox wipes. Now is a perfect time to start your own sustainability process.
